NEW ITEMS 2006-2007

TELESCOPES

MICROSCOPES

BINOCULARS

RIFLESCOPES

SPOTTING SCOPES

One of Konus best-selling telescopes is now most appealing than ever in this deluxe version that has been released with the purpose of helping young astronomers to better develop their passion. Along with its standard accessories and its R.A. motor drive, we just added some other invaluable tools such as a beautiful soft case for carrying the telescope around and an astronomical software with the most outstanding features and the most spectacular graphics. Named "Sky Explorer", this software will indeed guide the user through the subtleties of astronomy as explained in the table below.

KONUSTART 900 SPECIAL

Deluxe carrying case

#1740 KONUSTART-900 SPECIAL

Ø60 F.900
REFRACTOR

WHAT CAN THE "SKY-EXPLORER" SOFTWARE DO?

- A) Predicts or recreates the appearance of the sky and the position of the astronomical objects in any time period, past, present or future.
- B) Identifies with extreme precision the astronomical objects that can be seen from the location of the observer.
- C) Lets you know in advance which astronomical objects will be visible on a certain date in every place all around the world.
- D) Every astronomical object is represented in 3 dimensions with the most realistic graphics, way better than any competing software in the market.
- E) The software comes with a database featuring hundreds of thousands of astronomical objects.
- F) Every astronomical simulation is done with the most accurate computation accuracy, thus making this software the most advanced in the market.
- G) The software is in English language, with operational instructions in English, Italian and Spanish.

(from 2.2ft to 3.8ft), red dot finder, 2x barlow lens, 1.5x image rectifier, moon filter, 2 diam. 31.8 (1.25") eyepieces H8 and H20, moon and sky map, one softcase for carrying the telescope, one cd-rom "Sky Explorer" in english. | 113x, 226x, 45x, 90x |

Two models with distinctive optical and mechanical quality for an exciting astronomical experience. The Konusmotor-130 offers the triple advantage of a large 130mm aperture, an extremely compact tube and an impressive 1000mm focal length that provides a high magnification power. The Konusmotor-70 is a versatile model that excels in the terrestrial observation too. These two "deluxe" models include a never-before-seen array of extra features: soft cases for carrying the telescopes everywhere (one for the Konusmotor-70 and two for the Konusmotor-130), electric focuser, R.A. motor drive, Plossl eyepieces and the incomparable "Sky-Explorer" software with its countless functions.

CRYSTAL 45

The Crystal-45 microscope # 5425 (which completes the Konus line of professional stereo microscopes along with the Crystal-Pro # 5424) is a versatile zoom model with magnification power from 7x to 45x and with two incorporated illuminators for transmitted and incidental light, while a third illuminator is available in the optional ring light # 5482. Its standard working distance is 100mm, but can be extended to 165mm (when the microscope is equipped with optional 20x eyepieces and 0.5x objective) or reduced to 26mm (when the microscope is equipped with optional 2x objective) in order to fit every possible requirement. Due to their quality, price and comprehensive accessories, the Crystal microscopes have been a true best-seller for many years for Konus.

FOR COMPUTER VIDEO USE

FEATURES

5425 Stereoscopic microscope with trinocular head, supplied with two WF 10x wide field eyepieces and zoom objectives from 0,7 to 4,5x. Inter pupillary distance regulation, dioptic regulation, zoom handles on both sides stand with transparent and white/black disc. Double illumination regolable with halogen lamp 12V/15W. Built in illuminator with fluoresent bulb. Instructions.

5481 Fluorescent light illuminator, which can be applied directly to the microscopes objective. Voltage, adapter for fixing to microscope included.

5138 Dark field for gemmology (Base not included).

A new and exciting electronic thermometer that combines the most innovative design with the appeal of a high-tech tool, all of this at a price that can't be beat. Aside of showing the temperature in both C° and F°, it is also equipped with multicoloured lights that will flash in 5 different sequences and will therefore turn this article into an interesting and visually pleasing spectacle that will be hard to ignore. A great piece of furniture for both home and office, as well as an original idea for gifts and promotions.

Their name says all, since these binoculars are a true revolution that encompasses all of the most significant achievements of the last 30 years in the binoculars' technology. Stylish and aggressive design, rugged and extremely compact body, impeccable optical quality in any weather condition including rain and snow. Hunters, birdwatchers and outdoor enthusiasts will fall in love with their crisp and sharp vision, delivered by their fully multi-coated lenses, BAK-4 prisms, extra large eyepieces, extra long eye relief and nitrogen filled body. The absolute top of the line among Konus binoculars.

The Audax binoculars are tailor-made for nature and outdoor enthusiasts. Designed with a military style, they are built to exceed the expectations of even the most demanding user. Fully waterproof and nitrogen filled, they will challenge the most hazardous weather including heavy rain and snow. Equipped with BAK-4 prisms, wide field eyepieces, extra long eye relief and dark green coating treatment, they will provide the sharpest and most impressive optical quality with any light condition, from dawn till dusk. All of this while being significantly more compact and portable than the standard 8x42-10x42 binoculars.

The key of the success of the Titanium series of binoculars has always been its remarkable quality offered at a more than affordable price. So we decided to develop also two compact models with 8x25 and 10x25 size that replicate the same features of the main 8x42-10x42 models: BAK-4 prisms, extra large eyepieces, multi-coated optics, extra long eye relief, fully waterproof and nitrogen filled body.

A huge success in the very specialized and demanding USA market, the Titanium binoculars have become the favourite choice of avid hunters and birdwatchers. Hence we decided to make these binoculars even more suitable to the needs of those people by adding a brand new and extremely realistic "camouflage" look that is also aesthetically pleasing. The same state-of-the-art specifications of the Titanium series are now available in a classic 10x42 size and in a compact 10x25 size, ready to be tested on the field for the most immersive and rewarding outdoor experience.

PROFESSIONAL SPORT WATCHES

Among the various novelties that are currently under development and will be released in the following months, we want to mention these two products that truly have the potential to become a never-before-seen success in their respective categories. The Tornado is a 7x50 waterproof and nitrogen purged binocular with compass and reticle that is also floating, which means that it can't sink whenever it is accidentally dropped in water. The second novelty is the Konuscamo, a 20-60x70 zoom spotting scope with an innovative "camouflage" design that will make our line even more complete and more appealing for hunters, birdwatchers and outdoor enthusiasts.
